

Contents

1	General Introduction	1
1.1	Introduction to the guide	1
1.2	Part B and other Building Regulations	2
1.3	A brief history of Part B	4
1.4	The requirements	5
1.5	Optional approaches	6
1.6	Which volume of the Approved Document?	7
1.7	Where do you start?	7
2	Fire safety and design	9
2.1	Limitations and opportunities for design	9
2.2	Issues to be considered as a design develops	9
2.3	Site layout	10
2.4	Internal planning	10
2.5	Construction	11
2.6	Mechanical and electrical services	12
2.7	Key information	13
3	Site layout	16
3.1	General	16
3.2	B1 Means of warning and escape	17
3.3	B4 External fire spread	17
3.4	B5 Access and facilities for the Fire and Rescue Service	27
4	Internal planning	34
4.1	General	34
4.2	B1 Means of warning and escape	34
4.3	B5 Access and facilities for the Fire and Rescue Service	86
5	Construction	92
5.1	General	92
5.2	B1 Means of warning and escape	92
5.3	B2 Internal fire spread (linings)	98
5.4	B3 Internal fire spread (structure)	103
5.5	B4 External fire spread	127
5.6	B5 Access and facilities for the Fire and Rescue Service	132
6	Mechanical and electrical services	135
6.1	General	135
6.2	General introduction	135

6.3	B1	Means of warning and escape	136
6.4	B3	Internal fire spread (structure).....	149
6.5	B5	Access facilities for the Fire and Rescue Service	153
7		Fire safety engineering	154
7.1		General introduction	154
7.2		Historical background	154
7.3		Approach.....	155
7.4		Appointing a fire safety engineer	156
7.5		Preliminary fire studies.....	157
7.6		Potential areas where fire safety engineering could contribute	158
		Index	161
